VIAVI PSD30-2AF

Universal DC Capacitance Test Set

The PSD30–2AF is designed to calibrate and troubleshoot any DC capacitive fuel quantity system.

The PSD30-2AF will perform these functions:

- Measure the capacitance or insulation resistance of any DC capacitive fuel quantity system with required aircraft specific interface cable (not included).
- Simulate the capacitance of any DC fuel quantity system to calibrate or troubleshoot the system.
- Measure the DC voltage to the fuel quantity gauge in the range of 0–40 VDC in .01 VDC increments.

Features

- Solid-state circuits and LCD backlit display for low power consumption and high reliability
- Tested and approved for use with fuel in tanks
- Portable, lightweight, sealed, high-impact ABS case reduces weight of tester, with batteries installed, to less than 12 pounds
- Small size permits testing in restricted spaces
- Very easy to operate; choose the FUNCTION desired and read the measured capacitance, insulation or voltage on the display
- Auto-ranging circuit and 4.5 digit display permit resolution to .01 pF in capacitance functions and .01 meg in insulation (megger) function
- Digital Multi-meter (DMM) function reads external voltage up to 40 VDC
- BATTERY CHECK function reads percent of usable battery charge remaining
